Real-World Education.

In this one-year (second year optional) ADA-CODA accredited community health center-based program, AEGD post doctoral residents receive comprehensive training in general dentistry as well as superior preparation for advanced specialties. The program – the largest in the world of its kind– builds experience in large practice settings, working with general and specialist dentists, dental hygienists and dental assistants and physicians. Residents participate in: public and community health related activities, advanced clinical rotations in dentistry and medicine developed by the program and training sites. LMC Dental AEGD training will empower you with the skills and confidence to handle virtually any clinical challenge.

Real-World Advantage.

This unique and exceptional program advances your skills in general dentistry in a way that traditional school-based or clinic-only-based programs cannot. Guided and mentored by our world-class faculty, you will perform thousands of procedures on patients in state-of-the-art clinical facilities that serve underserved and culturally diverse communities. Here, as part of a service learning mission, you are given the means not only to develop your professional skills and learn the business side of running a practice, but you also discover how you can best utilize your advanced skills.

The vast majority of LMC Dental’s AEGD residents go on to become successful oral healthcare professionals in community health centers, private practices, dental public health programs, schools of dentistry, healthcare organizations and clinical operations management. Many remain with LMC Dental to play a significant role in one of its programs often because they have found that LMC Dental’s approach gives them an opportunity to make a lasting difference in the lives of so many.

More Places, Complex Cases and Diverse Populations

AEGD resident training takes place in over 155 community health centers and affiliated hospitals throughout the continental United States, Alaska, Hawaii, and the Caribbean. These facilities are located in areas that serve the poor, chronically ill and those living in urban, rural and remote communities where access to quality oral health care services is limited or non-existent.

Be part of the service learning mission: Learn while providing quality healthcare services to underserved communities and populations.
AEGD Curriculum and Program Strengths

The AEGD program provides you with in-depth, hands-on, personalized clinical training that will encompass 75% of your experience. You will provide comprehensive oral health care to patients towards case completion and have the opportunity to perform a variety of standard and advanced clinical procedures in all areas of dentistry. You will be assigned to one health center site for the entire year of training in order to promote continuity of care for the patients and continuity of experience. Residents treat general dentistry patients, medically complex cases and age-specific conditions.

Your didactic instruction includes formal lectures via video-teleconferencing, asynchronous web-based forums, lectures and small, group interactive sessions. Courses, electives and requirements include core public health subjects as well as:

- Patient Risk Assessment
- Diagnosis
- Treatment Planning
- Preventive Dentistry
- Restorative Dentistry
- Oral Surgery
- Practice Development Management Skills
- Endodontics
- Periodontics
- Fixed & Removable Prosthodontics
- Implant Dentistry
- Pain & Anxiety Control/Conscious Sedation
- Medical Emergency Management
